Smart PoE PD-Alive Check

ALL-SG8610PM managed PoE switch can be configured to monitor connected PD status in real time. Once the PD stops working and responding, ALL-SG8610PM will resume the PoE port power and bring the PD back to work. They will greatly enhance the network reliability through the PoE port resetting the PD's power source and reducing administrator management burden.
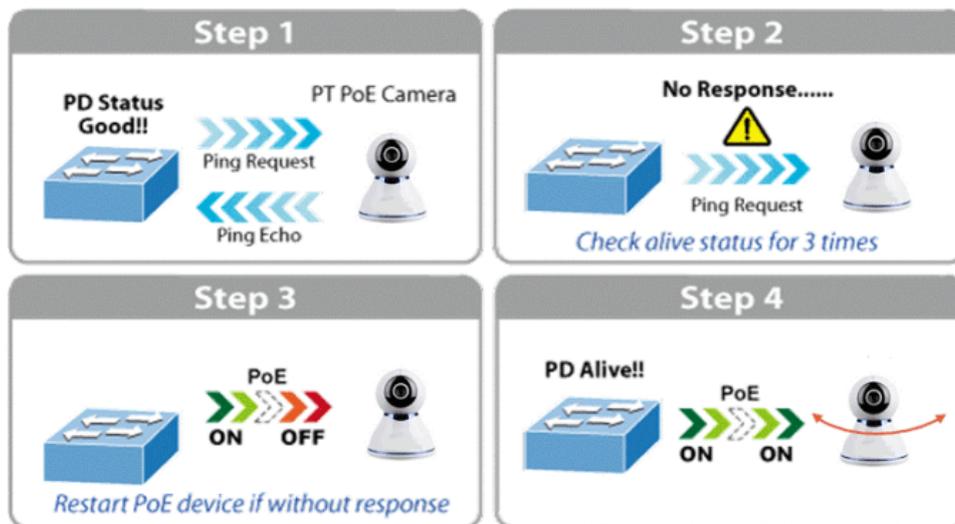

**PoE Schedule Function for Energy Saving**

For environmental protection purpose, the ALL-SG8610PM switch Ethernet PoE can effectively control the power supply besides its capability of giving high watts power. The PoE schedule function helps to enable or disable PoE power feeding for each PoE port during specified time intervals and it is a powerful function to help SMBs or enterprises save power and money.
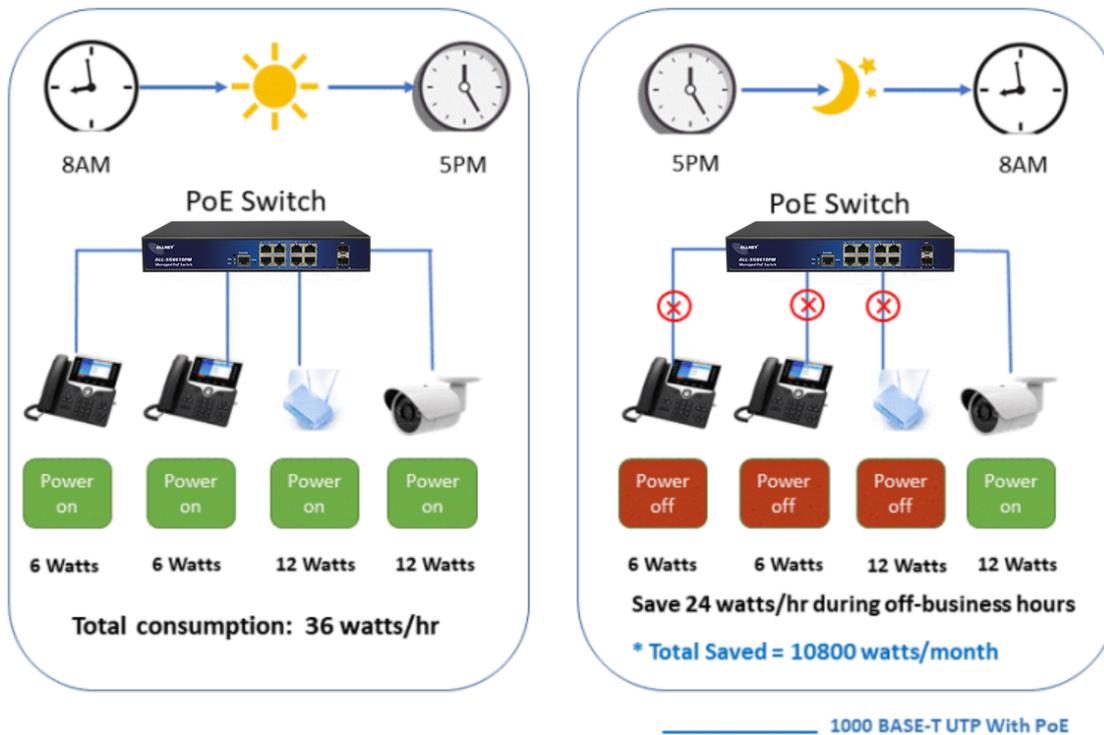

Scheduled PD Re-starting

The ALL-SG8610PM smart switch PoE allows each of the connected PoE IP cameras or PoE wireless access points to reboot at a specific time each week. Therefore, it will reduce the chance of IP camera or AP crash resulting from buffer overflow.
