

ALLNET Brick'R'knowledge I2C PIO 8574AT

>>> [Go to the shop article](#)

EAN CODE

The Arduino has a special Bus, called I2C with that you can connect several bricks. The 8574 is a brick with that you can receive additional 8 in and output and therefore extend the IO-ports easily. The I2C uses addresses for the bricks that you can change mechanically to use maximum 8 of those bricks. Here is the 8574AT type used.
