

ALLNET Industrial Powerline 200Mbit Headend Unit/TD Repeater

>>> Go to the shop article

EAN CODE

Central unit/master for the Industrial powerline network. Can feed the signal into Powerline and Coax network at the same time.

Can also be used as a Time Domain repeater. Allows the extension of the network by up to 63 new CPEs or other repeaters. It can amplify/distribute the signal from a headend unit or another repeater.

Supports:

- Modulation: OFDM (Orthogonal Frequency Division Multiplexing)
- OVLAN (optimized VLAN)
- VLAN 802.1Q konform
- MAC Filtering
- MAC/RADIUS authentication
- bandwidth management
- QoS nach IEEE802.1p oder IPv4 TOS
- Spanning Tree IEEE 8021D
- Rapid Spanning Tree IEEE 802.1w

Part No.: 70342
Vendor Part No.: PL2-REP-T20C

- SNMP v2

- QoS

Dimensions: L23 x W15 x H8 cm
