

Tool box for the installation of fiber optic links

Fiber Optic Tool Box

The NetPeppers fiber optic tool kit contains everything, you need for the installation of fiber optic cabling.

Whether FTTX, building, or campus cabling:

The carefully selected tools support you in preparing fiber optic cables for field-terminable connectors, fusion splices, mechanical splices or in repairing of already existing fiber optic lines.

The components of the case are carefully selected and usefully assembled for the fiber optic installer.

More than the sum of its parts

This assortment includes tools for fiber preparation and -cleaning before splicing and for checking of the finished fiber optic lines.

Quality at a fair price

What good is a case with 100 tools and none of them you don't want to work with? The fiber optic tool box consists of high quality tools, so that every application is a pleasure.

Everything has its place

The case is equipped with a foam insert adapted to the tools. Find every part without time-consuming searching.
