The 24 Ethernet ports supports IEEE802.3.af/at PoE output, can work with PoE PD devices like IP cameras, wireless AP, doorbell etc. With Rich L2+ management function, it is easy to set up to meet the projects technical requirements. It is an ideal solution for CCTV surveillance, wireless coverage and other SMB applications.

### Rich PoE Management function

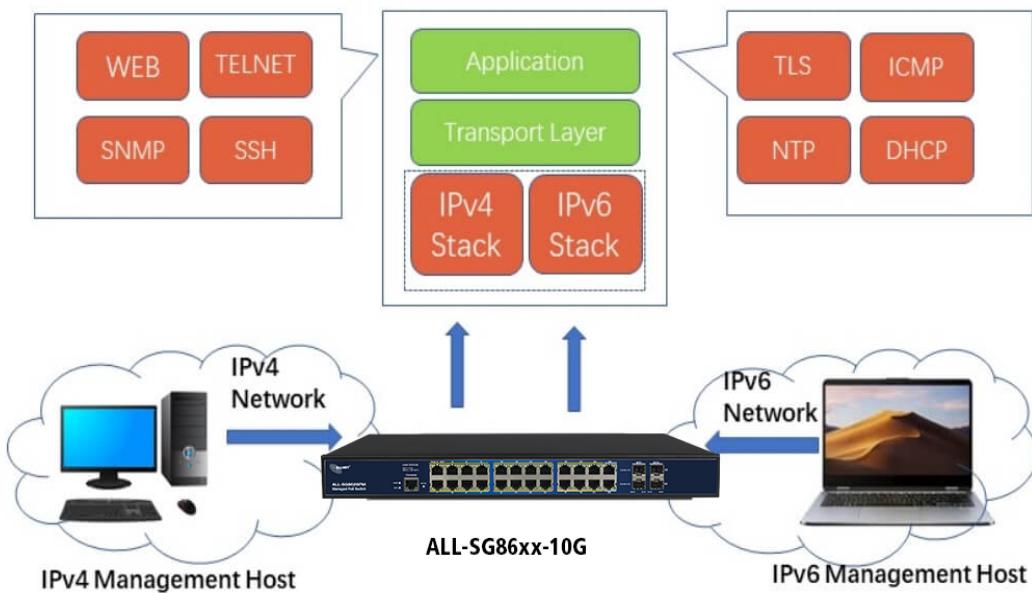

- PoE PD-alive check
- Scheduled power rebooting
- PoE schedule
- PoE usage monitoring
- Soft-reboot PoE Non-stop
- PoE port power feeding priority

### 10Gbps Uplink Capacity for Big Bandwidth Application

10G Ethernet is a big leap in the evolution of Ethernet. The 10G SFP+ slots supports dual-speed 10GBASE-SR/LR or 1000BASE-SX/LX, meaning the administrator now can flexibly choose the suitable SFP/SFP+ transceiver according to the transmission distance or the transmission speed required to extend the network efficiently. It is a cost-effective solution for SMB network to achieve the maximum performance of the 10G networks

### Solution for IPv6 Networking

With the IPv6/IPv4 dual stack and other management functions, the ALL-SG8628PM-10G is the best choice for IP CCTV surveillance, VoIP and wireless solution providers to develop the IPv6 network. Meanwhile they help the SMBs to upgrade their network infrastructures to the IPv6 era without any extra investment.

### Robust Layer 2 Features

The ALL-SG8628PM-10G can be programmed for advanced switch management functions, such as port aggregation, Q-in-Q VLAN, Spanning Tree Protocol, QoS, bandwidth control, ERPS, IGMP/MLD snooping etc. The ALL-SG8628PM-10G allows the operation of a high-speed trunk combining multiple ports.

### Powerful Security Functions

The ALL-SG8628PM-10G provides a comprehensive access control list (ACL) for enforcing security to the edge. It can be used to restrict network access by denying packets based on source and destination IP address, TCP/UDP port number or defined typical network applications. Its protection mechanism also comprises 802.1x

Port-based and MAC-based user and device authentication. With the private VLAN function, communication between edge ports can be prevented to ensure user privacy.

#### **Enhanced Security and Traffic Control**

The ALL-SG8628PM-10G supports DHCP Snooping, IP Source Guard and Dynamic ARP Inspection functions to prevent IP snooping from attack and discard ARP packets with invalid MAC address. The network administrator can now construct highly-secure corporate networks with considerably less time and effort than before.

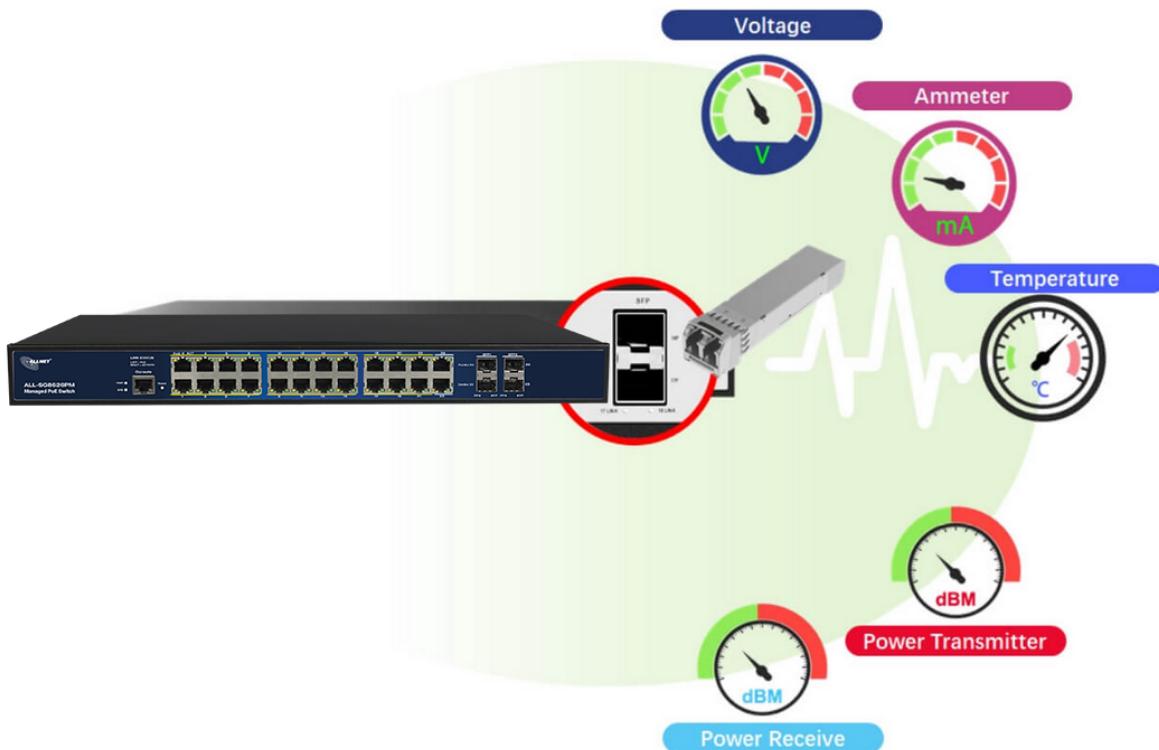

#### **User-friendly Secure Management**

For efficient management, ALL-SG8628PM-10G managed switch series is equipped with console, web and SNMP management interfaces. With management interface, ALL-SG8628PM-10G offers an easy-to-use, platform independent management and configuration facility. The ALL-SG8628PM-10G supports SNMP and it can be managed via any management software based on the standard SNMP v1 or v2 Protocol. Meanwhile the ALL-SG8628PM-10G offers Cisco-like command via Telnet or console port and customer doesn't need to learn new command from these switches. Moreover, the ALL-SG8628PM-10G offers the remotely secure management by supporting SSH,SSL and SNMP v3 connection where the packet content can be encrypted at each session.

#### **Intelligent SFP DDM Function**

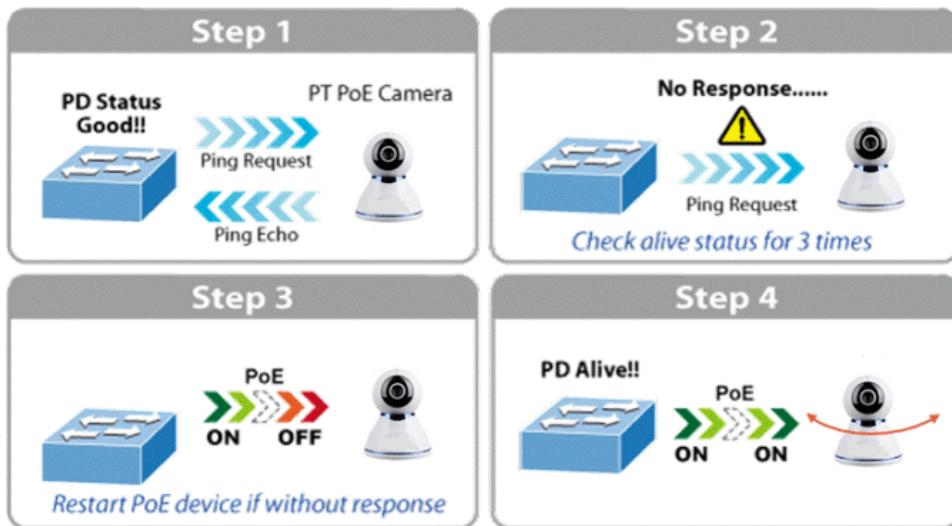

The ALL-SG8628PM-10G support SFP-DDM (Digital Diagnostic Monitor) function that greatly helps network administrator to easily monitor real-time parameters of the SFP and SFP+ transceivers, such as optical output power, optical input power, temperature, laser bias current, and transceiver supply voltage.

### **Digital Diagnostic Monitor (DDM)**

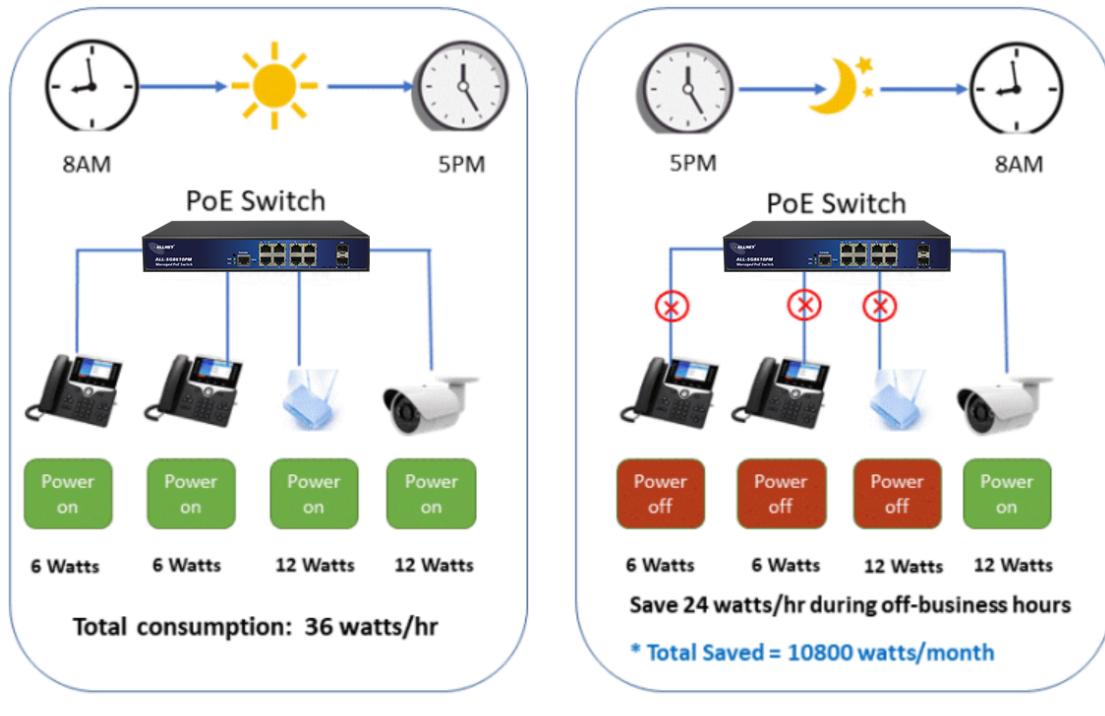

### Smart PoE PD-Alive Check

ALL-SG8628PM-10G managed PoE switch can be configured to monitor connected PD status in real time. Once the PD stops working and responding, ALL-SG8628PM-10G will resume the PoE port power and bring the PD back to work. They will greatly enhance the network reliability through the PoE port resetting the PD's power source and reducing administrator management burden.

### PoE Schedule Function for Energy Saving

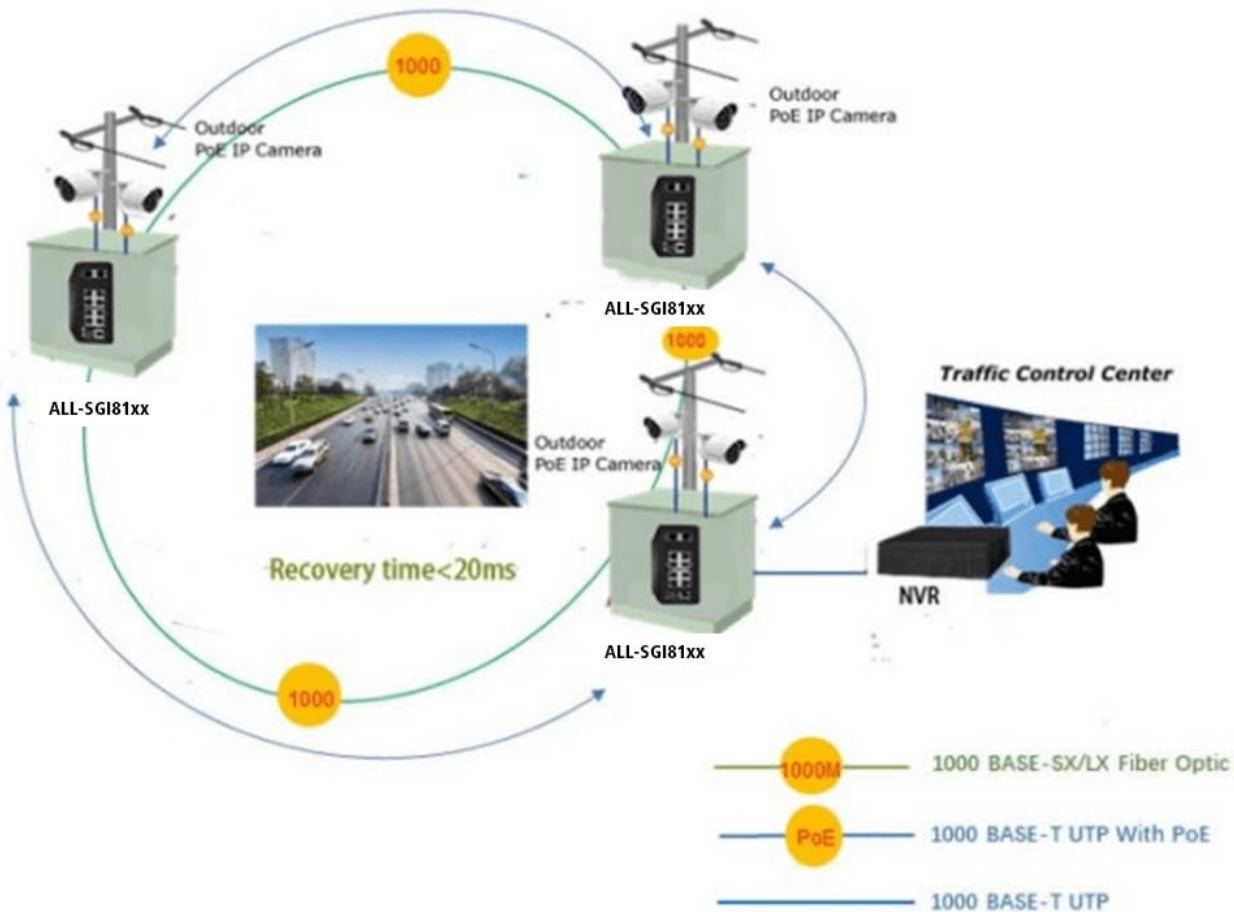

For environmental protection purpose, the ALL-SG8628PM-10G switch Ethernet PoE can effectively control the power supply besides its capability of giving high watts power. The PoE schedule function helps to enable or disable PoE power feeding for each PoE port during specified time intervals and it is a powerful function to help SMBs or enterprises save power and money.

#### Scheduled PD Re-starting

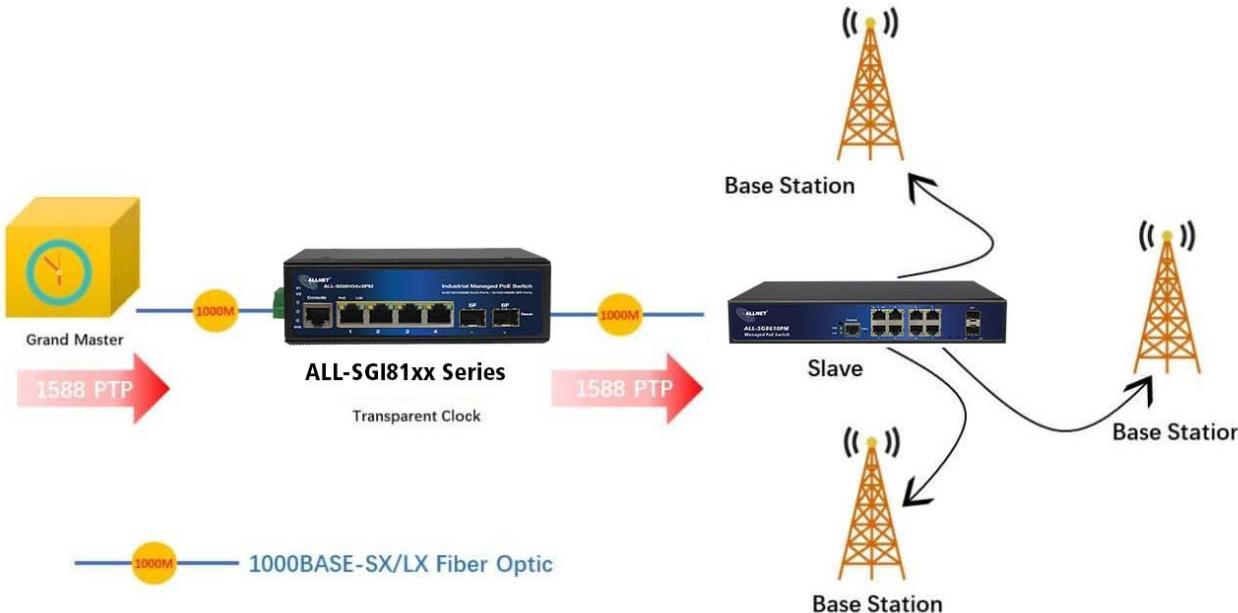

The ALL-SG8628PM-10G smart switch PoE allows each of the connected PoE IP cameras or PoE wireless access points to reboot at a specific time each week. Therefore, it will reduce the chance of IP camera or AP crash resulting from buffer overflow.

## ERPS Ring for Video Transmission Redundancy

### 1588 Time Protocol for Industrial Computing Networks

The ALL-SG8628PM-10G is ideal for telecom and Carrier Ethernet applications, supporting MEF service delivery and timing over packet solutions for IEEE 1588 and synchronous Ethernet.
