

## ALLNET Powerline reject-filter 2.0 - 40 Mhz 25A

>>> [Go to the shop article](#)

### EAN CODE

With the help of this Eichhoff powerline filter, you can "lock" Powerline subsegments to larger installations such as hotels or to network similar with powerline technology.

Because of this reject-filter, the segments do not interfere with each other.

The reject-filter is designed for a capacity of 25A power for DIN rail mounting.

The frequency range is between 2.0 to 40 Mhz.

Temperature range: -25°C bis +100 °C
