## ALLNET GaN QC USB-C PD Power Supply 45 Watt \*\*EU PLUG\*\* 1x USB Typ-C with 2m fixed cabel

### Highlights:

GaN stands for the material gallium nitride, which is increasingly used for semiconductors in chargers. The advantage of GaN over silicon chargers is that it generates less heat. Less heat means that components can be placed closer together without sacrificing power capacity and in accordance with safety standards. The charging process is accelerated because the electric current can pass through the GaN components more quickly.

The QC designation stands for QuickCharge® from Qualcomm® which the power supply supports. PD is an intelligent management technology, which enables the so-called PD chips in active power cables and devices to always transmit the permitted voltage and current. It contributes extremely to safety and devices & cables can no longer be overloaded and hot.

- Input: 100~240V, 50/60Hz 1.2A max  
Output :5V 3A,9V 3A,12V3A,15V3A,20V2.25A  
With 2M type C cable

Very high quality power supply with PD USB-C for all modern devices with HighSpeed Charging, e.g. Quad SATA Kit for Raspberry Pi 4, Rock Pi, smartphones, tablets, netbooks and notebooks or all other devices that can be charged via USB Type-C or PD.
