Watt:	0,5
Nominal Service Life:	0 Std.
Switching Cycles:	0
Opt. Ambient Temperature.:	0 °C

Discover the versatile possibilities of digital LED Stripes! With the practical remote control or via the user-friendly app, you have full control over your lighting at all times - even outdoors. Choose from a variety of lighting effects and programmes or synchronise your lighting with your favourite music for a unique experience. Thanks to their robust construction, the LED Stripes are ideal for outdoor use and provide atmospheric lighting whatever the weather. Whether garden, terrace or balcony - bring colour and atmosphere to your surroundings.

The LED Stripes are pre-assembled and easy to install. The secure USB control allows for a hassle-free plug-and-play experience. The 5V DC low voltage ensures that the fairy lights do not overheat, making them particularly safe for children and pets. With 8 adjustable modes, you can customise the lighting to suit your needs. The IP65 waterproof rating as well as the overvoltage and short-circuit protection make the LED strips a safe choice for many applications. You can also shorten the vertical end of the chain as required without compromising functionality.

LED type: 2835 LED beads, 100 pieces on 10m cord

Control: remote control or app control, USB plug-and-play

Voltage: 5V DC, low voltage, insulated fairy lights
