## NVT PHYBRIDGE FLEX24-10G DATASHEET

## The most versatile Iot-enabling PoE switch on the market

## FLEX24-10G Managed Switch

The NVT Phybridge FLEX24-10G switch is the most versatile Power over Ethernet (PoE) switch on the market, designed to make IP/IoT deployments simple, secure, and cost-effective. The FLEX24-10G switch delivers up to 50 Watts of power (PoE++) and $10 / 100 / 1000$ Mbps symmetrical, full-duplex, over 2 or 4 pair UTP (unshielded twisted pairs) cabling with up to $2,000 \mathrm{ft}$ ( 610 m ) reach.*

The FLEX24-10G switch enables Modern LAN principles and comes standard with $2 \times$ SFP +10 Gb uplink ports, dedicated management and console ports, $24 \times 10 / 100 / 1000$ downlink ports, a 1,000 Watt hot-swappable power supply, power sharing, and power redundancy. The FLEX24-10G switch also comes with a new and intuitive GUI interface, ideal for any cloud or premise-based managed service offering. The new and improved CLI (Command Line Interface) is very similar to the Cisco offering for ease of use.

## Benefits Include:

- Accelerate your return on investment by reducing infrastructure costs.
- Simplify your IP modernization, collapsing planning and deployment time.
- Eliminate infrastructure barriers, risks, disruption, and costs.
- Create a robust, secure IP platform that is easy to deploy and manage.
- Be environmentally responsible during your IP upgrades.

## Speed, Reach and Power

FLEX24-10G switch delivers Gigabit speeds to standard reach and 10/100Mbps symmetrical (full-duplex) and PoE++ (50W) over 4-pair UTP or PoE+ (30W) over 2-pair UTP with 2,000ft (610m) reach. It is designed to support the most demanding IP endpoints with plenty of bandwidth to spare. The FLEX24-10G switch provides robust network performance at any distance.

## Industry Leading PowerWISE ${ }^{\circledR}$ Technology

The NVT Phybridge FLEX24-10G switch is built with PowerWISE Technology, providing power sharing for redundancy, hot-swappable power supply, and auto-sensing 100-240 VAC delivering 1,000 watts of power. The FLEX24-10G switch is one of the most energy efficient switches on the market, consuming 20 Watts of power to operate.
