#### **EAN CODE**

#### Your smart entry into building automation - ALLNET ALL3500v2

With the **ALLNET ALL3500v2 building automation centre**, you get a cost-effective and versatile platform that is optimally tailored to semi-professional requirements. Thanks to state-of-the-art technology, high connectivity and a wide range of applications, the ALL3500v2 is the perfect partner for your automation projects.

## Highlights at a glance:

- Cost-efficient platform: Maximum functionality with minimum space and cost requirements.
- Intuitive operation: Can be conveniently controlled via web interface (HTTP/HTTPS) or smartphone.
- Flexible data connection: Integration via JSON, MQTT or SNMP possible.
- Versatile sensor technology: Comprehensive monitoring of temperature, humidity, air pressure and more.
- Future-proof: Expandable with i2C sensor ports and compatible with a wide range of ALLNET sensors and actuators.

#### **Features that impress**

The ALL3500v2 is based on a stable embedded Linux platform (MIPS or ARM architecture), which enables seamless integration into existing systems. With four RJ45 ports for sensor modules, you can realise a wide range of control and monitoring tasks. Whether local control or cloud-based applications - the ALL3500v2 offers you all

the tools you need to organise your building automation efficiently and securely.

### **Versatile application options:**

- HACCP temperature monitoring: Precise detection and control in critical environments.
- Room climate control: Monitoring of temperature and humidity for demand-based control of heaters or humidifiers.
- Security management: Detection of gas odour, smoke or water ingress and triggering of alarms.
- Automated garden irrigation: Time and humidity-controlled for maximum efficiency.
- Energy consumption optimisation: Control based on consumption data from external sensors (e.g. ALL4590/4490 power meter).

# Compact, powerful, versatile

The ALL3500v2 combines a variety of functions in a compact design that has been specially developed for space-saving installations. With four relays, sensor ports and contact interfaces, it can be used flexibly and provides the basis for sophisticated automation solutions - ideal for private and commercial applications.

# Why ALLNET ALL3500v2?

With the ALL3500v2 you get a reliable and economical solution for building automation. From monitoring and control to integration into complex installations, this central unit offers everything you need for smart, efficient and future-proof automation.

Start your building automation now with the ALLNET ALL3500v2!

Part No.: 98686

Vendor Part No.: ALL3500v2

#### Versatile sensors, actuators and switching options for your automation

The ALLNET ALL3500v2 impresses with its flexibility and functionality: With four ports for external sensors and actuators, four relay outputs for controlling loads and four contact inputs for buttons or switches, it provides an ideal basis for complex automation applications.

# Sensing and control – Precise and versatile

With the ALL3500v2, you can measure and analyse a variety of environmental parameters such as temperature, humidity or air pressure and execute automatic switching operations based on them. Control is either manual, time-controlled or dynamic, based on the measured values.

## Connectivity that inspires

The ALL3500v2 is equipped with Ethernet and built-in WLAN, which enables easy integration into existing networks. Using an IP address in the TCP/IP network, you can:

- Retrieve and edit measurement data directly in the web browser.
- Receive automated notifications and reports by email.
- · Request and control data via JSON or XML interfaces.

Optional MQTT support enables the transmission of data to the cloud and integration into IoT environments.

With its powerful connectivity and flexible control options, the **ALL3500v2** is the perfect choice for efficient and future-proof building automation.

#### I<sup>2</sup>C-Bus – Intelligent use of existing cable networks

The **ALLNET ALL3500v2** enables an uncomplicated connection of measurement and control modules via a standard network cable (RJ45, Cat. 5). This allows you to continue using existing cable infrastructures such as network or telephone cabling and saves costs and effort during installation.

#### Advantages of the I<sup>2</sup>C bus system:

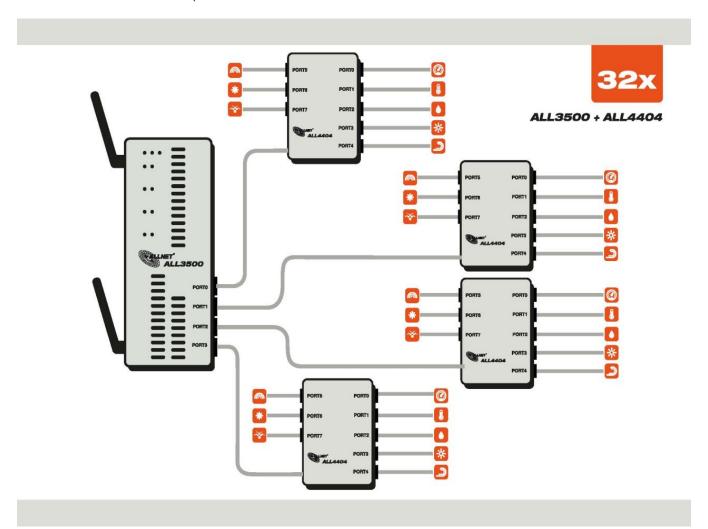

- Simple cabling: A standard network cable is sufficient to connect sensors and modules.
- Long range: Up to 100 metres of cable between the central unit and module.
- **Integrated power supply**: The modules are supplied with power directly from the central unit no separate power source required.

#### **USB** port – external memory connection

The USB port on the **ALLNET ALL3500v2** allows you to integrate external storage media easily and flexibly. This allows data to be saved and processed directly on connected USB devices. This enables extended data logging and analysis.
