Description

The HyperLink HG5158DP-10U and HG5158DP-13U series Omni-directional Antennas combine vertical and horizontal polarization with high gain in a single enclosure. It is a professional quality antenna designed primarily for MIMO point-to-multipoint applications in the 5.1-5.8 GHz frequency band.

This antenna incorporates advanced dual polarization technology that allows for the interoperability of two radios transmit and receive paths. This technology allows for the attenuation of unwanted signals from adjacent channels and/or co-located equipment.
