ALLNET ALL-HS02530 Wireless 300Mbit Hotspot in a Printer

Wireless Subscriber Gateway with built-in thermal printer to generate user's account for Internet access and is perfect for small venue owners

With BYOD trend today, Wi-Fi service isn't only a side benefit of your business, it also attracts people to come over. Most people need Wi-Fi access for their works, researches and communications. Therefore, the ALL-HS02530 offers you a robust and secure hotspot solution which is just perfect for the mini size venues such as café/airport, lounge/store or shop and provides customizable billing profiles.

While you focus on growing and managing your core business, the ALL-HS02530 can help to promote your products, services and satisfy your customers. With its user friendly design, venues owners can easily train their staffs to operate the gateway and print out the account ticket to access Internet for their customers.

The ALL-HS02530 can be used as a standalone authentication gateway to monitor and control Internet access while guests/visitors are visiting. The features of ALL-HS02530 support web-based authentication and management tool and marketing cooperation such as walled gardens, an internal portal page, and external portal page redirection. It also offers bandwidth and billing management for users who need the differential QoS.

Traditionally, the small venues provide guests public access to Internet with one common username/password. It is insecure and easy to get identity hijacked. The venue owner will take lots of efforts to provide the secure Internet access for guests. They have to pre-build user's accounts and print them out. With advantage of the ALL-

HS02530 patented Account Generator, you just press a button to print the Internet access ticket with private username/password in few seconds.

We also design a login page for venues to key-in guests/visitors identity to fit the laws. According to the law, it requires venue owners to provide the guest's Internet usage records for tracking. Thus the ALL-HS02530 provides a Real-time session information and the remote site administrator could monitor the real time usage status via Session information page.

The ALL-HS02530 is one of unique innovation from Handlink, it's more than a simple Wi-Fi hotspot device; it's also equipped with IP Plug and Play technology so there's no need for end-users to change any settings in the their devices.

It's fast, easy and trouble free to access Internet.

FEATURES

- All-In-One Instant Hotspot Gateway with built-in Thermal Printer
- Compatible with IEEE802.11n/b/g, Wireless 2T2R 2.4GHz with 300Mbps high speed network
