RELIABLE POWER DISTRIBUTION WITH OUTLET CONTROL AND CONFIGURABLE COLOR LCD

Provides reliable power distribution with color configurable LCD display featuring real-time remote/local monitoring and outlet control for connected equipment

Ideal for server room and IT applications, the Switched PDU Series is a power distribution device that delivers electricity from a single source to multiple devices. The PDUs feature individual outlet control, which allows for immediate on/off, remote reboots, scheduled on/off, and more. The PDUs are built-in with Ethernet module, which works with PowerPanel Power Management Software for real-time monitoring. The products can achieve $\pm 1\%$ measurement accuracy, and also feature configurable color LCD, external site ground pin, industrial-grade metal housing, adjustable mounting brackets, long input power cord, and cord retention tray.
