

ALLNET Switch full managed Layer2+ 28 Port • 24x GbE • 4x SFP+ • 19" • JSON API • ALL-SG8628MJ-10G

>>> [Go to the shop article](#)

EAN CODE

ALLNET Switch full managed Layer2+ 28 Port • 24x GbE • 4x SFP+ • 19" • JSON API • ALL-SG8628MJ-10G

Highlights:

- 24 ports Gigabit Layer2+ switch architecture (**ports 1~24**).
- 4 ports SFP+ 10G slots for optional GBICs compatible (ports 25~28)
- Supports SFP DDM & cable diagnostics
- Supports G.8032 ERPS, self-detection time < 20 ms
- Supports 1588 V2.0, transparent clock
- Supports port aggregation
- 4KV & overvoltage protection, 6KV contact/8KV air ESD protection
- 19"-angle or wall/table mounting possible
- NEW: LAN JSON-Java-Script-Notation API for ON/OFF via remote

ALL-SG8628MJ-10G has 24*10/100/1000Base-T RJ45 ports and 4*10G Base-X SFP fibre slot ports with Layer 2 management. Supports desktop and 1U/19-inch rack installation.

10Gbps uplink capacity for high bandwidth applications

10G Ethernet is a major leap forward in the development of Ethernet. The 10G SFP+ sockets support dual-speed 10GBASE-SR/LR or 1000BASE-SX/LX, which means that the administrator can now flexibly select the appropriate SFP/SFP+ transceiver according to the transmission distance or speed to efficiently expand the network. It is a cost-effective solution for SME networks to achieve the maximum performance of 10G networks.

Solution for IPv6 networks

With the IPv6/IPv4 dual stack and other management features, the ALL-SG8628MJ-10G is the best choice for IP CCTV, VoIP and wireless solution providers to develop IPv6 networks. At the same time, they help SMEs to migrate their network infrastructures to the IPv6 era without additional investment.

Robust Layer 2 functions

The ALL-SG8628MJ-10G can be programmed for advanced switch management functions, such as port aggregation, Q-in-Q VLAN, Spanning Tree Protocol, QoS, bandwidth control, ERPS, IGMP/MLD snooping, etc. The ALL-SG8628MJ-10G enables the operation of a high-speed trunk that combines multiple ports.

Powerful security features

The ALL-SG8628MJ-10G provides a comprehensive access control list (ACL) to enforce security at the network edge. It can be used to restrict network access by denying packets based on source and destination IP addresses, TCP/UDP port numbers or defined typical network applications. The protection mechanism also includes 802.1x port-based and MAC-based user and device authentication. The private VLAN function can be used to prevent communication between edge ports in order to protect user privacy.

Improved security and traffic control

The ALL-SG8628MJ-10G supports the DHCP Snooping, IP Source Guard and Dynamic ARP Inspection functions to protect IP snooping from attacks and to discard ARP packets with invalid MAC addresses. The network administrator can now set up highly secure company networks with significantly less time and effort than before.

User-friendly, secure management

For efficient management, the ALL-SG8628MJ-10G managed switch series is equipped with console, web and SNMP management interfaces. With the management interface, the ALL-SG8628MJ-10G provides a user-friendly, platform-independent management and configuration option. The ALL-SG8628MJ-10G supports SNMP and can be managed via any management software based on the standard SNMP v1 or v2 protocol. At the same time, the ALL-SG8628MJ-10G offers Cisco-like commands via Telnet or the console port, so the customer does not have to learn new commands for these switches. In addition, the ALL-SG8628MJ-10G provides secure remote management by supporting SSH, SSL and SNMP v3 connections, where packet contents can be encrypted at each session.

Intelligent SFP DDM function

The ALL-SG8628MJ-10G supports the SFP-DDM (Digital Diagnostic Monitor) function, which allows the network administrator to easily monitor real-time parameters of the SFP and SFP+ transceivers, such as optical output power, optical input power, temperature, laser bias voltage and transceiver supply voltage.

Digital Diagnostic Monitor (DDM)**Redundant ring with fast recovery for critical network applications**

The ALL-SG8628MJ-10G supports redundant ring technology and has a strong, fast self-recovery capability to prevent interruptions and external intrusions. It integrates advanced ITU-T G.8032 ERPS technology, Spanning Tree Protocol (802.1s MSTP) and a redundant power supply system into the customer's industrial automation network to improve system reliability and uptime in harsh factory environments. In a given simple ring network, the data link recovery time can be as fast as 20 ms.

ERPS Ring for Video Transmission Redundancy

1588 time protocol for industrial computer networks

The ALL-SG8628MJ-10G is ideal for telecommunications and carrier Ethernet applications and supports MEF service provisioning and timing-over-packet solutions for IEEE 1588 and synchronous Ether

JSON-Java Script Object Notation API

With the JSON API, the ADMIN can create a special user and grant this user authorisation for JSON. We have focussed on 2 functions that we consider important.

- PoE ON/OFF & LAN Port Enabled/Disabled (for switches with PoE function)
- LAN Port Enabled/Disabled (for switches without PoE)

Part No.: 231180
Vendor Part No.: ALL-SG8628MJ-10G

JSON Examples

ALLNET JSON API (json output, switching with json response)

It will ONLY be switched, NO-sensor values read!

Valid for ALLNET PoE switch ALL-SG8826PMX-10G, ALL-SG8950PM, ALL-SG8926PM.
New additions from 2024: All ALL-SG86xx and ALL-SG81xx with the suffix "J" for JSON in the name.

In this description used Device IP is "192.168.0.100".
This must be replaced by the assigned address.

Description without Activated Basic authentication. If this is enable, you must pass the Authentication in URL.
(Basic Authentication: <https://192.168.0.100/xml/json.php>)

Call "<https://192.168.0.100/xml/json.php>".

Parameter

„id={id}“ Number or name of the switching sensor / actuator
„set={0/1/toggle}“ Switch actuator off or on
„callback={object}“ (optional) Values are returned as JSON object

Technical data:

Model	ALL-SG8628MJ-10G
Copper Ports	24-10/100/1000BASE-T RJ45 auto-MDI/MDI-X ports
Fibre ports	4x1G/10GBASE-X SFP interfaces, supports 1G/10Gbps dual mode
Console ports	1 x RS-232-to-RJ45 serial port (115200, 8, N, 1)
Switch architecture	Store-and-forward
Switch Fabric	128 Gbps/non-blocking
Throughput	95.2Mpps @64 bytes
Address Table	32K entries
Share Data Buffer	32Mb
Jumbo Frame	9600 bytes
SDRAM	2Gb
Flash memory	128Mb
Flow control	IEEE 802.3x pause frame for full-duplex

	Back pressure for half-duplex
Reset button	>2 sec: Factory default and reset
Power supply	100~240V AC, 50/60Hz, 4A (max.)
Power consumption	Max. 60 watts/1122 BTU
