

## **Omada Solution**

## Software Defined Networking (SDN) with Cloud Access

Omada Software Defined Networking (SDN) platform integrates network devices, including access points, switches and gateways, providing 100% centralized cloud management. Omada creates a highly scalable network—all controlled from a single interface. Seamless wireless and wired connections are provided, ideal for use in hospitality, education, retail, offices, and more.

## Hassle-Free Centralized Cloud Management

100% centralized cloud management of the whole network from different sites——all controlled from a single interface anywhere, anytime.

## Zero-Touch Provisioning for Efficient Deployment\*

Omada zero-touch provisioning allows remotely deployment and configuration of multi-site networks, so there's no need to send out an engineer for on-site configuration. The Omada Cloud ensures efficient deployment with lower costs.

 $<sup>\</sup>hbox{$^*$ Zero-Touch Provisioning is supported when using Omada-Cloud Based Controller.}\\$ 

## Al-Driven Technology for Stronger Performance and Easy Network Maintenance

## Intelligent Network Analysis, Warning, and Optimization\*

- Analyzes potential network problems and sends optimization suggestions for higher network efficiency
- Locates network faults, warns and notify users, and generates solutions to reduce network risk

# Auto Channel Selection and Power Adjustment

Provides powerful wireless performance while greatly reducing Wi-Fi interference by automatically adjusting the channel settings and transmission power levels of neighboring APs in the same network.

## Assign Different Management Roles

Multi-user privilege assignment is available to increase management efficiency and security. Multi-person management, multi-level permissions, and the ability to add admins as needed, enable flexible network operation and maintenance.

## Easy and Intelligent Network Monitoring

The easy-to-use dashboard makes it easy to see your real-time network status; check network usage and traffic distribution; receive network condition logs, abnormal event warnings, and notifications; or even track key data for better business results. Network topology helps IP admins quickly see and troubleshoot connection at a glance.

## Comprehensive Protection for the Whole Network

## Multiple Factors Guarantee Higher Reliability

Higher reliability of cloud service is guaranteed with 99.9% SLA availability, 24/7 automated fault detection, geographically isolated backup servers, and reliable product quality. Your network functions even if management traffic is interrupted.

## Reliable Connections Even with High-Density Clients

Equipped with enterprise chipsets, dedicated antennas, advanced RF functions, auto channel selection, and power adjustment, Omada APs have high concurrency capacities for remarkable performance in high-density environments.

## **EAP Product Features**

## Easy-Mount Design

The Ceiling Mount EAP's elegant appearance and easy-mount design promote fast installation on any wall or ceiling surface, and allow it to blend in seamlessly with most interior decorating styles. The slimline, inconspicuous Wall Plate EAP can be easily installed into any standard EU/US wall junction box or 86 mm wall junction box.

## PoE Power Supply\*

With IEEE 802.3af/at/bt PoE or Passive PoE, you can use Ethernet cables to transfer both electrical power and network data, making deployment more flexible and removing the need to install additional power cabling.

## Business-Class Hardware Design

Enterprise-class chipsets offer outstanding performance and support longer running time, higher client capacity and greater range. Dedicated high-power amplifiers, specialized antennas and professionally designed RF shields ensure excellent wireless performance.

## Seamless Roaming\*

802.11k and 802.11v seamless roaming provide seamless switching to the access point with optimal signal when moving between APs.

#### Mesh\*

Omada Mesh technology enables wireless connectivity between access points for extended range, making wireless deployments more flexible and convenient.

## Increased Efficiency with OFDMA\*

The Wi-Fi 6 and above standards use OFDMA for more efficient channel use and reduced latency. Imagine your WiFi connection as a series of delivery trucks delivering data packets to your devices. With 802.11ac Wi-Fi, each delivery truck could only deliver one parcel to one device at a time. But with OFDMA, each truck can deliver multiple parcels to multiple devices simultaneously. This vast improvement in efficiency works for both uploads and downloads.

## Advanced RF Management

MU-MIMO, Airtime Fairness, Beamforming, and Band Steering Technologies guarantee optimal RF performance for business-level applications.

## Easy Centralized Management

Configure and monitor hundreds of Omada EAPs with ease using the Omada controller.

- \* PoE support varies by model. For detailed information, refer to the specifications.
- \* Only certain devices support Seamless Roaming. For detailed information, refer to the specifications.
- \* Only certain devices support Mesh. For detailed information, refer to the specifications.
- \* Only 802.11ax and 802.11be devices support OFDMA.

# EAP Product List

Ceiling Mount Wi-Fi 6 AP			
Picture			
Model	EAP683 LR		
Product	AX6000 Ceiling Mount Wi-Fi 6 Access Point		
Speed	2.4 GHz: 1148 Mbps, 5 GHz: 4804 Mbps		
Ethernet Port	1x 2.5Gbps Ethernet Port		
Power Supply	802.3at PoE or 12V/2A DC		
	DC Power Adapter Is Not Included		
Internal Antennas	2.4 GHz: 4 × 4.0 dBi, 5 GHz: 4 × 5.0 dBi		

# Specifications

Ceiling Mount Wi-Fi 6 AP						
Model		EAP683 LR				
Name		AX6000 Ceiling Mount Wi-Fi 6 Access Point				
	LAN Interfaces	1x 2.5Gbps Ethernet Port				
	Wi-Fi Standards	IEEE 802.11 a/b/g/n/ac/ax				
	Maximum Data Rate	2.4 GHz: 1148 Mbps, 5 GHz: 4804 Mbps				
	Wireless Client Capacity	2GHz: 256, 5GHz: 256				
	Antennas	2.4 GHz: 4 × 4.0 dBi, 5 GHz: 4 × 5.0 dBi				
Main Design	Transmit Power	CE: <20 dBm(2.4 GHz EIRP); <23dBm(5 GHz band 1 & band 2 EIRP); <28dBm(5 GHz band 3 EIRP) FCC: <26 dBm(2.4 GHz); <26dBm(5 GHz)				
	Reception Sensitivity	2.4GHz: 11ax HE20 MCS0:-95dBm;11ax HE20 MCS11:-65dBm 11ax HE40 MCS0:-92dBm;11ax HE40 MCS11:-64dBm 5GHz: 11ax HE20 MCS0:-94dBm;11ax HE20 MCS11:-64dBm 11ax HE40 MCS0:-91dBm;11ax HE40 MCS11:-61dBm 11ax HE40 MCS0:-88dBm;11ax HE40 MCS11:-58dBm 11ax HE60 MCS0:-85dBm;11ax HE160 MCS11:-55dBm

Ceiling Mount Wi-Fi 6 AP						
Model		EAP683 LR				
Physical & Environment	Power Supply	802.3at PoE or 12V/2A DC DC Power Adapter Is Not Included				
	Maximum Power Consumption	EU: 20.43W(For PoE); 17.7W(For DC) US: 23.51W(For PoE); 20.63W(For DC)				
	Reset	•				
	Mounting	Ceiling / Wall mouting (Kits included)				
	Certifications	CE, FCC, RoHS				
	Dimensions (W x D x H)	220 x 220 x 32.5 mm				
	Net Weight	694.6g				
Others	Enclosure Material / Rack Material	Top cover: PC-V0  Bottom shell: aluminum alloy ADC-12  Mounting rack: SUS304 stainless steel				
	Lightning Protection	Air discharge: ±8kV  Contact discharge: ±4kV  Common mode: 10/700: ±4kV				
	Environment	Operating Temperature: 0 °C–40 °C (32 °F–104 °F); Storage Temperature: -40 °C–70 °C (-40 °F–158 °F); Operating Humidity: 10%–90% non-condensing; Storage Humidity: 5%–90% non-condensing;				

## Antenna Radiation Patterns

## **Disclaimers**

### Wireless Speed and Range Disclaimer

Maximum wireless transmission rates are the physical rates derived from IEEE Standard 802.11 specifications. Range and coverage specifications were defined according to test results under normal usage conditions. Actual wireless transmission rate and wireless coverageare not guaranteed, and will vary as a result of 1) environmental factors, including building materials, physical objects and obstacles, 2) network conditions, including local interference, volume and density of traffic, product location, network complexity, and network overhead and 3) client limitations, including rated performance, location, connection quality, and client condition.

### Wireless Client Capacity Disclaimer

Wireless client capacity specifications were defined according to test results under normal usage conditions. Actual wireless client capacity is not guaranteed, and will vary as a result of 1) environmental factors, including building materials, physical objects and obstacles, 2) network conditions, including local interference, volume and density of traffic, product location, network complexity, and network overhead and 3) client limitations, including rated performance, location, connection quality, and client condition.

#### **Ethernet Port Limitation Disclaimer**

Actual network speed may be limited by the rate of the product's Ethernet WAN or LAN port, the rate supported by the network cable, Internet service provider factors and other environmental conditions.

#### MU-MIMO Disclaimer

(Only for certain devices)

MU-MIMO capability requires client devices that also support MU-MIMO.

## **Seamless Roaming Disclaimer**

(Only for certain devices)

Seamless roaming requires both the access point and client devices to support 802.11k and 802.11v protocols.

## Lightning and Electro-Static Discharge Protection Disclaimer

(Only for outdoor devices)

Protection against lightning and electro-static discharge may be achieved through proper product setup, grounding and cable shielding. Refer to the instruction manual and consult an IT professional to assist with setting up this product.

#### PoE Disclaimer

PoE budget calculations are based on laboratory testing. Actual PoE power budget is not guaranteed and will vary as a result of client limitations and environmental factors.
