4. Dimensions(Standard CECC 86-275-801/802)

5. Colour coding

With the E-2000™ system by R&M customers are free to determine the code colours for adaptor and connector by different colours unlatching brackets themselves, allowing them to be able to identify different lines, applications, starting points, etc. quickly and easily.

Blue	RAL 5015	Black	RAL 9005
Brown	RAL 8004	Orange	RAL 2003
Green	RAL 6018	White	RAL 9010
Red	RAL 3020	Yellow	RAL 1016

In addition the code colours of connector and adaptor housings identify ferrule polish geometry. Blue (5015) means (PC) ferrule and green (6018) angled physical contact APC (HRL) ferrule.

6. Mechanical Coding

The mechanical coding system by R&M separates the various services mechanically, therefore effectively preventing operation within different networks or any mixing up of interactive and distributive services. The mechanical coding system includes interconnectable adaptors plus coloured unlatching levers for connectors. For additional distinction the mechanical coding is also colour coded.

Red	RAL 3020	Orange	RAL 2003
Brown	RAL 8004	Violet	RAL 4008
Yellow	RAL 1016	White	RAL 9010

Different mechanical codings cannot be interconnected, yet a connection to a not mechanically coded adaptor is always possible. Removing the unlatching levers is an additional protection against unwanted plugging out of connections.

7. Specifications E-2000™ Simplex Adaptor SM/MM

7.1 Optical properties

Description	Requirement	Standard	Result
Insertion loss (IL) [dB]	≤ 0.2 dB	IEC/EN 61300-3-4	pass

7.2 Mechanical properties

Mating cycles	1000 cycles	IEC/EN 61300-2-2	pass
Pull out force	70 N	IEC/EN 61300-2-6	pass

7.3 Climatic class

		Category	IEC/EN	
Cold	-25 °C for 96 h	U	61300-2-17	pass
	-10 °C for 96 h	C	61300-2-17	pass

	+60 °C for 96 h	C	61300-2-18	pass
Change of temperature	-25 °C / +70 °C; 20 cycles	U	61300-2-22	pass
	-10 °C / +60 °C; 5 cycles	C	61300-2-22	pass

7.4 Long-term endurance

Heat resistance	+70 °C for 1000 h	IEC	61300-2-18	pass
Damp heat	+40 °C at 93 % r.F. for 21 days	EN	61300-2-19	pass
	+40 °C at 93 % r.F. for 96 h	IEC	61300-2-19	pass

7.5 Material

Description	Material	Colour (RAL)	
		LSH	LSH-APC 8°
Sleeve	Zirconia ceramic		
Housing	PBT/UL94 V-O	Blue (5015)	Green (6018)
Dust cap	PBT/UL94 V-O	Blue (5015)	Green (6018)

7.6 Compatibility

Compatibility with other manufacturers is confirmed in conformance with CECC 86 275-801 /802 and EN 186270 Type LSH.

ST Connector

Technical Specification

This specification covers the requirement of the ST Connector for SM and MM applications.

APPLICATIONS

- Long distance telecommunications
- Fibre optic active components
- Test and measure instruments
- CATV

FEATURES

- Low insertion loss
- Environmental stable
- Easy to handle
- Easy to assembly

MODELS

The ST connector is available for PC applications.

The boot can be chosen between the following standard colours:

SM:

- Yellow (Standard for 3 mm model)

MM:

- Black (Standard for 3 mm model)

For MM duplex patch cords standard will be one black and one red boot for each side

OPTICAL CHARACTERISTICS

Typical Insertion Loss [dB] at 1310 nm

SM	MM
0.15	0.25

Return Loss [dB]

	PC	SPC
SM	> 40	> 45

MECHANICAL CHARACTERISTICS

- Max tensile load of cable pulling: 120 N
- Corrosion resistant body

ENVIRONMENTAL SPECIFICATIONS
